

AOX Digital Workflow with Photogrammetry Resource Guide

Doctors are busy, we get it. You choose which CE courses you have time to attend, or maybe the courses that add the most value to your practice. So why do so many other Doctors think that the OnXX Digital course should be on your top 3 list of courses?

LET'S GO THROUGH 7 IMPORTANT REASONS.

- 1. Learn the most advanced and lowest cost digital AOX workflow**
OnXX Digital is hands down one of the most advanced courses for digital workflows. If you've tried to go digital with nightmare issues or you know you need to just do it but aren't sure how, the OnXX team can show you a solution that's the only Automated Prosthodontic system in the world.
- 2. Increase profitability of each case**
Understanding and increasing the economics of AOX cases is a win for you and a win for your patients. Learn how this digital workflow will substantially increase profitability.
- 3. Significantly reduce the risk of AOX complications**
The Prosth side is often where all the complications stem from. Our founder, Dr. Don Ross, is a recognized national expert prosthodontist on AOX restorations. He personally shows you how to cut complications, remove practice stress and achieve greater patient satisfaction.
- 4. Double the number of full-arch surgeries per day**
You want to do more cases but production is holding you back? Not anymore. See how you can double case production.
- 5. Reduce patient chair time and number of appointments**
You love your patients, but no one wants to see them seven to ten times. It kills the practice, upsets the patient, and costs you money. Cutting appointments and chair time is a primary benefit of the OnXX Digital workflow.
- 6. Close more cases with a defined patient journey**
There is a difference between knowing how to do cases and knowing how to close cases. The course will show you a process that will increase case acceptance, giving you tangible tools.
- 7. Improve staff productivity and morale with structured workflow**
Believe it or not, your AOX process can negatively affect morale and staff productivity. When you are happy, patients are happy, and the process is easy, seamless and predictable, you have a happier team!

These seven benefits came from doctors who attended the OnXX course. Minor investment, major benefits, not only for you but **your entire staff.**
